How to Read the Final Exam Calendar:

The Meeting times and dates listed in the body of the chart represent the time and day the class normally meets during the semester. The column and row headings indicate the date/day and time of the exams.

1. Find the class time/day on the grid
2. Find the day and date of the exam on the same row to the left.
3. Find the time of the exam listed at the top of the column.

For example, if a class meets from 3:00-4:15pm on Tuesdays and Thursdays during the semester, their exam would be Thurs, Dec 6 from 1:00-4:00pm according to the chart below.

**Common Exams:** Common exams occur in the evenings. If a course has common final exams, all sections of the course meet and take the exam on the same evening, at the same time, regardless of when they met during the semester. Most common exams are spread across several buildings/rooms to accommodate the large number of students. Students will receive instructions about the location for their common exam from their instructors. Find the dates/days/times for common exams in the far right column on the exam grid.

**Classes Scheduled at Non-Standard Times & their Exams:** If a class met at a non-standard meeting time (a time not listed on the approved campus time schedule) during the semester, the instructor should find the class time on the final exam grid that most closely matches the start time and the meeting days of his/her class. This should ensure that the room will be available for the exam.

For example, if a class met from 9:00am until 9:50am on MWF during the semester, the instructor would see that the exam for MWF 9:10-10:00am classes is scheduled for Wed., Dec. 5 from 8:00am-11:00am according to the chart below. This is the time and meeting pattern (MWF) that most closely matches his class’s meeting pattern. He should hold his final exam at the same time on the same day/date.
